

Medication Review

Care360 Health System | Confidential Clinical Record

Patient ID: P1007

Date: 2026-05-14

Section 1: Current Medication List

Metformin 1000 mg PO BID - indication: type 2 diabetes. Lisinopril 20 mg PO daily - indication: hypertension. Atorvastatin 40 mg PO nightly - indication: hyperlipidemia. Aspirin 81 mg PO daily - indication: cardiovascular prophylaxis.

Section 2: Adherence Assessment

Pharmacy refill data indicates approximately 80% adherence to lisinopril and full adherence to metformin. Patient reports occasional missed evening statin doses.

Section 3: Identified Gaps

Lisinopril refills remaining: 0 - refill authorization required. No documented gaps for metformin or atorvastatin. Recommend 90-day supply to improve adherence.

Section 4: Pharmacist Recommendations

Renew lisinopril and align refill dates across chronic medications. Consider once-daily combination therapy to reduce pill burden. Reinforce statin adherence counseling at next visit.
