

Adverse Event Reporting SOP

Care360 Health System | Confidential Clinical Record

Patient ID: N/A (Policy)

Date: 2026-02-15

Section 1: Purpose and Scope

This standard operating procedure defines the process for identifying, documenting, and reporting adverse events and adverse drug reactions across all Care360 clinical settings.

Section 2: Definitions

An adverse event is any untoward medical occurrence in a patient regardless of causal relationship. A serious adverse event results in death, is life-threatening, requires hospitalization, or causes persistent disability.

Section 3: Reporting Timelines

Serious adverse events must be reported to the safety officer within 24 hours of discovery. Non-serious events must be documented in the electronic health record within 72 hours. Regulatory submission follows applicable local and federal requirements.

Section 4: Documentation Requirements

Each report must include patient identifier, event date, description, suspected cause, severity, action taken, and outcome. Reference the source clinical note and any associated medication or lab record.

Section 5: Roles and Responsibilities

Clinicians identify and document events. The safety officer reviews and classifies reports. Quality committee performs monthly aggregate review and initiates corrective action where trends are identified.
